E0 225: Design and Analysis of Algorithms

- There will be biweekly assignments, two in-class tests, and one final exam. The assignments will account for 10% of the final marks. The two tests will be worth 25% and the final exam 40% of the final grade.
- The problem sets are mainly for your benefit, and they will be “softly” graded, meaning that we will mainly check whether you have made a decent attempt.
- The problem sets and assignments will be made available on the Piazza site. Please submit your solutions to daa18iisc@gmail.com
We encourage you to LaTeX your writeups, but it’s not required.
- We encourage you to discuss problem sets with your classmates, but make sure that the final writeup is in your own words. Plagiarism will be strictly dealt with.
- The two class tests are scheduled for September 19 (Wednesday) and October 29 (Monday), respectively.
