1	<p>The course was novel and discussed relevant concepts. But the assignments were very lengthy, demanding, time consuming and in spite of these had tight deadlines, considering that the students are working professionals too and that the work also sometimes demand extra efforts. On top of it the evaluations too were a bit stringent and the ROI in terms of effort to marks were somewhat disheartening.</p> <p>Consideration regarding the students work assignments and assignments/learning as part of other courses enrolled in and a bit leniency in the evaluation and deadlines for assignments would make it a more commendable course. Else, right now it feels like signing up for a very demanding course (for a part time student).</p>

1	<p>Knowledge and the efforts to share the same are excellent. Maybe sharing the research papers to be discussed in the next lecture beforehand might help a bit more, so that student can go through once, attend the lecture understand it more and maybe go through it again to get a better understanding.</p> <p>As mentioned in the course feedback, considering the students work assignments (for part time students) and assignments/learning as part of other courses enrolled in, a bit leniency in the evaluation and deadlines for assignments would make it a more recommendable course. Else, right now it feels like signing up for a very demanding course (for a part time student).</p> <p>Also, the feedback regarding why the marks were deducted for assignments need to be part of the evaluation instead of just marks.</p>
