1	A really good, well structured course.
2	Additional homework for different topics
3	Learnt a lot in this course.
4	The course is very good. Instructor's teaching style is very good and also content of the course is very good and we explored a variety of topics related to system security in this course.
5	The way the course has been organized is great. Exams are easy to crack if you are attentive enough in class. The assignments were heavy but learned a lot from them and absolutely loved the assignment of stack smashing. The course keeps up with the current literature, for example, we learned about attacks which are pretty recent. The course provides with an overall view of system security and as Sir said in the first class "a toolkit" to deal with threats to system security.
