## Additional Comments

<b>Sl. No</b> 1	<b>Comments</b> Assignments must be based on actual linux kernel source code as well.

- 2 Very nice course. Content was good. Discussions in the class were especially encouraged by the profs. Just one thing I wished was the availability of a TA, given that setting up assignments was a tough job. Also, the assignments and the course coverage were not as much in synch as I had wished. And it would have been good if some work(like on consistency models) had been given on thread synchronization as assignments don't cover that explicitly.

### Instructor Comments

Sl. No	Comments
1	I liked the course overall and appreciate that both the profs were experts in their fields and as well as teaching. Specifically I enjoyed the classes taught by using board more than that by using slides. I hoped that more time was given to the section on threads and locks.
2	Initially pace of teaching is very fast, so that it was difficult to follow. Gradually pace of teaching decreased to moderate, which helped to follow and also classes become interactive at the end.
