1	His teaching is good. but sometimes i feel he unnecessarily complicates the subject by teaching new advanced things.

Additional Comments

Sl. No	Comments
1	Certain topics like Networking was not touched upon.
2	In pintos is fun to solve but still useless workload, because it has nothing to do with what is taught, is class. So remove pintos and make project compulsory.
3	The assignment should be allowed to do in pairs as they require a lot of time. Other than that it would be helpful if assignment deals with the working of the real Linux kernel and not pintos kernel as our research will be more closely related to the real kernel which is much more complex and we will be more motivated too.
4	The class timings was a major drawback.
